Physical Sciences

Matter and Its Interactions

Students who demonstrate understanding can:

HS-PS1-1 Use the periodic table as a model to predict the relative properties of elements based on the patterns of electrons in the outermost energy level of atoms.

→ **D8** *Atoms* "Atomic Orbitals"

→ **E1** *Periodicity* "Structures of the Elements"

→ **P1** *Main Groups & Transition Metals* "Alkali Metals"

→ **P2** *Main Groups & Transition Metals* "Alkaline Earth Metals"

→ **P3** *Main Groups & Transition Metals* "Boron Group"

→ **P4** *Main Groups & Transition Metals* "Carbon Group"

→ **P6** *Main Groups & Transition Metals* "Nitrogen Group"

→ **P7** *Main Groups & Transition Metals* "Oxygen Group"

→ **P10** *Main Groups & Transition Metals* "Halogens"

→ **P11** *Main Groups & Transition Metals* "Noble Gases"

HS-PS1-3 Plan and conduct an investigation to gather evidence to compare the structure of substances at the bulk scale to infer the strength of electrical forces between particles.

→ **C13** *Chemical Matter* "Physical Changes"

→ **F1** *Chemical Bonding* "The Attraction Between Ions"

→ **H15** *Liquids & Solids* "Surface Tension"

→ **H22** *Liquids & Solids* "Vapor Pressure"

→ **H24** *Liquids & Solids* "Types of Bonding in Solids"

HS-PS1-4 Develop a model to illustrate that the release or absorption of energy from a chemical reaction system depends upon the changes in total bond energy.

→ **F8** *Chemical Bonding* "Energetics of Covalent Bonding"

→ **M2** *Kinetics* "Reactive Collisions"

→ **M3** *Kinetics* "Mechanism of a Reaction"

HS-PS1-5 Apply scientific principles and evidence to provide an explanation about the effects of changing the temperature or concentration of the reacting particles on the rate at which a reaction occurs.

→ **M1** *Kinetics* "Observing a Reaction"

→ **M2** *Kinetics* "Reactive Collisions"

HS-PS1-6 Refine the design of a chemical system by specifying a change in conditions that would produce increased amounts of products at equilibrium.

→ **N1** *Equilibria* "Dynamics of Equilibria"

→ **N2** *Equilibria* "Equilibrium and Temperature"

→ **N3** *Equilibria* "Equilibrium and Pressure"

HS-PS1-7 Use mathematical representations to support the claim that atoms, and therefore mass, are conserved during a chemical reaction.

→ **M1** *Kinetics* "Observing a Reaction"

→ **M3** *Kinetics* "Mechanism of a Reaction"

Motion and Stability: Forces and Interactions

Students who demonstrate understanding can:

HS-PS2-4 Use mathematical representations of Newton's Law of Gravitation and Coulomb's Law to describe and predict the gravitational and electrostatic forces between objects.

→ **F1** *Chemical Bonding* "The Attraction Between Ions"

→ **L4** *Thermochemistry* "Vibrating Diatomic Molecule"

HS-PS2-6 Communicate scientific and technical information about why the molecular-level structure is important in the functioning of designed materials.

→ **U6** *Pharmaceutical Chemistry* "Small-Molecule Prescription Drugs"

→ **Y3** *Industrial Chemistry* "High Explosives"

→ **Stockroom** *Organic* "Polyolefins"

→ **Stockroom** *Organic* "Rubber"

→ **Stockroom** *Organic* "Liquid Crystals"

Energy

Students who demonstrate understanding can:

HS-PS3-1 Create a computational model to calculate the change in the energy of one component in a system when the change in energy of the other component(s) and energy flows in and out of the system are known.

→ **L2** *Thermochemistry* "Thermal Energy"

→ **L4** *Thermochemistry* "Vibrating Diatomic Molecule"

→ **L6** *Thermochemistry* "Specific Heat"

HS-PS3-2 Develop and use models to illustrate that energy at the macroscopic scale can be accounted for as a combination of energy associated with the motions of particles (objects) and energy associated with the relative positions of particles (objects).

→ **L4** *Thermochemistry* "Vibrating Diatomic Molecule"

→ **L6** *Thermochemistry* "Specific Heat"

HS-PS3-3 Design, build, and refine a device that works within given constraints to convert one form of energy into another form of energy.

→ **L4** *Thermochemistry* "Vibrating Diatomic Molecule"

HS-PS3-4 Plan and conduct an investigation to provide evidence that the transfer of thermal energy when two components of different temperature are combined within a closed system results in a more uniform energy distribution among the components in the system (second law of thermodynamics).

⟶ **03** *Chemical Thermodynamics* "Heat Conduction"

HS-PS3-5 Develop and use a model of two objects interacting through electric or magnetic fields to illustrate the forces between objects and the changes in energy of the objects due to the interaction.

⟶ **F1** *Chemical Bonding* "The Attraction Between Ions"

⟶ **F8** *Chemical Bonding* "Energetics of Covalent Bonding"

⟶ **H17** *Liquids & Solids* "Attraction Between Water Molecules"
